

**Aztec PI Solutions provides OSIsoft PI System™ related services whether you're an existing user or are considering a new implementation.**

### REMOTE PI ADMIN SUPPORT

**Why hire a full time PI Administrator? Let us take care of all of the day-to-day maintenance and operation of your PI System by using our experienced Remote PI Administrators. Our Basic Remote PI Admin Support includes:**

- Daily health checks
- 24/7 PI System status monitoring
- PI System maintenance (tag compression review, interface optimization, and roll-out of software updates)
- Management of PI System user accounts
- PI Tag maintenance (including PI Tag creation and PI Tag attribute editing)
- PI System and configuration documentation
- Work with OSIsoft's Technical Support (when issues do arise)
- Change Management

If you are new to remote monitoring, we can work with you to implement proven secure VPN access to your PI System. Annual or 6 month renewable Basic Remote PI Admin Support contracts are available.

**Aztec's PI engineers have been designing, developing, and implementing PI Systems since 1992 and include experienced ex-OSIsoft employees. Aztec PI Solutions has successfully delivered many customer projects based on OSIsoft PI ProcessBook®, PI DataLink® and RtReports throughout the world.**

### ADDITIONAL SERVICES

**For established PI Systems additional value can be gained by upgrading to our Advanced Remote PI Admin Support which includes all the basics plus:**

- Develop and test PI DataLink® reports
- Develop PI ProcessBook® screens
- Provide Webinar based user training for end users of the developed screens and reports

Aztec Technologies is a consulting firm offering Engineering, Process Automation, Project Management, and Information Technology services to a variety of industries including Biotech, Pharmaceutical, Chemical, Medical Device, Water/Wastewater, and Diagnostic industries.

PI System is the property of OSIsoft, LLC
